

# Roman Fedyunin

Data Engineer  
Saratov, Russia | +7 (961) 646-72-47 | fediuninrom5991@gmail.com | Open to business trips  
Citizenship: Russia | Work authorization: Russia, Serbia

## Professional Summary

Data Engineer with 5+ years of experience in backend QA automation and data-focused testing. Builds practical ETL pipelines with incremental loading, idempotent processing, and data quality controls. Hands-on with Python, SQL, PostgreSQL, and Docker; experienced in CI/CD integration and API validation.

## Core Skills

|                   |                                                                     |
|-------------------|---------------------------------------------------------------------|
| Data Engineering  | ETL, DWH, incremental loading, data validation, data quality checks |
| Programming       | Python, SQL, basic C# (test automation)                             |
| Databases & Tools | PostgreSQL, pandas, Apache Airflow, Apache Superset, Docker, Git    |
| Collaboration     | Atlassian Jira, Atlassian Confluence, CI/CD pipeline integration    |
| Languages         | Russian (Native), English (C1 Advanced)                             |

## Professional Experience

### Self-employed / Personal Project - Data Engineer

Apr 2025 - Present

- Designed and implemented an end-to-end ETL pipeline for research data from Binance API (ingestion, cleansing, normalization, loading).
- Implemented incremental loading using watermark tracking and keyset pagination for stable processing of growing datasets.
- Ensured idempotent loads with UPSERT patterns and duplicate protection.
- Built data quality checks for field validation and invariant monitoring.
- Deployed solution with PostgreSQL and Docker.
- GitHub: <https://github.com/saitamRe/CPT2.git>

### ROKO Labs (IT / Systems Integration) - Senior QA Engineer

Nov 2020 - Present | Saratov

- Developed automated backend API testing systems (Python, C#), including data processing and validation scenarios.
- Worked directly with PostgreSQL to verify data correctness and create SQL checks for service logic.
- Integrated automated test pipelines into CI/CD workflows.
- Participated in service data-flow and business-logic analysis with development teams.

## Education

### Yuri Gagarin State Technical University of Saratov

Master's degree (expected 2027) - Information Security, Institute of Electronic Engineering and Instrumentation
